

Used this documentation:

<https://docs.ros.org/en/crystal/Tutorials/Topics/Understanding-ROS2-Topics.html>

<https://docs.ros.org/en/crystal/Tutorials/Understanding-ROS2-Actions.html>

Start simulator (terminal one):

```
ros2 run turtlesim turtlesim node
```

Show topics (terminal two):

```
ros2 topic list
```

Get info for velocity command topic:

```
ros2 topic info /turtle1/cmd_vel
```

This shows the message type as a twist.

Get info and interface for pose topic:

```
ros2 topic info /turtle1/pose
```

```
ros2 interface show turtlesim/msg/Pose
```

Now we have to send twist commands through this topic to move the turtle.

Set heading to an angle of 45:

```
ros2 action send_goal /turtle1/rotate_absolute turtlesim/action/RotateAbsolute "{theta: 0.785398}"
```

Move at 2m/s:

```
ros2 topic pub --times 2 --rate 1 /turtle1/cmd_vel geometry_msgs/msg/Twist "{linear: {x: 2.0, y: 0.0, z: 0.0}, angular: {x: 0.0, y: 0.0, z: 0.0}}"
```

Get the pose:

```
ros2 topic echo /turtle1/pose
```
